Database DevOps with SQL Server on Docker with GitHub

Brian A. Randell, Product Marketing Director
GitHub

Brian A. Randell

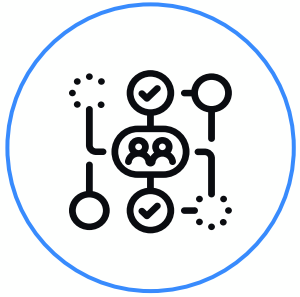
@octobrian

Product Marketing Director, GitHub

Agenda

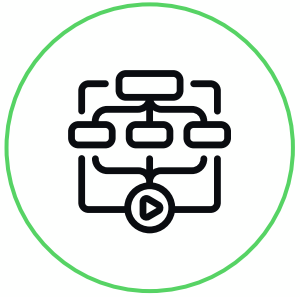
Database Development

Your Inner Loop



Database DevOps

Your Outer Loop



Containers + Databases

Is this the best way?

Demo

Summary

- Database Development
  - SQL Server development is fully cross-platform
- Database DevOps
  - Proper team development of your SQL Server databases is possible
- Containers + Databases
  - Sometimes the most obvious is not the what you thought it was

Q&A
